

Apple TV Menu

This extension implements a single level menu with backdrop filter blur and scaling hover effect, inspired by the Apple TV Menu.

The Apple TV menu has the usually styling options like font, background, text color, border radius, padding etc. Also, several animation easing effects are included. The 'scale' property specifies the amount of scaling when the user hovers over the menu item. For example: 1.2, scales the item 120%.

The menu has support icon libraries (WWB16.1+), like Font Awesome, Material Icons, Open Iconic, IonIcons etc. <https://wysiwygwebbuilder.com/iconfonts.html> Icons can also be published as embedded SVG to keep the page weight low.
