

## Bootstrap Navigation Bar - Version 1.2

The Bootstrap Navigation Bar extension implements a multi-level, responsive navigation bar optimized for desktop computers and mobile (touch) devices. On desktop computer the menu will display a standard drop down menu and on mobile devices it will display a multi-level stacked menu with the familiar 'hamburger' icon. The menu is inspired by the Bootstrap navbar component.

Unlike most other drop down menus, this menu requires a click to open the sub menus instead of mouse over. This makes the menu work the same way on desktops and touch devices.

Features:

- pills, tabs, drop down and navbar
- stacked (vertical) mode
- justified tabs or pills (full width)
- Font Awesome icons support
- hamburger menu (left or right side of the menu)
- supports full width in layout grids.
- configurable arrow offset and drop down shadow color.
- text alignment in sub menus
- integrates with @font-face and Google fonts functionality of WWB.
- and lots of styling options!

## ***General Properties***

Add, edit and remove menu items to the menu. Each item can have a title, link and Font Awesome icon. The 'active' property can be used to indicate the current page.

**Note:** if the button only has 1 sub item then it will not show the drop down menu. Instead the button will be used as link.

## ***Style Properties***

### **Font**

Font is the font family of text, such as Arial and Times New Roman.

### **Style**

Style of the font such as Bold, Italic or Regular.

### **Appearance**

Sets the appearance of the menu:

- default
- pills
- pills justified
- pills stacked
- tabs
- tabs justified

### **Alignment**

Specifies the text alignment when the menu is in mobile mode.

### **Spacing**

Specifies the spacing between buttons.

### **Icon Offset**

Specifies the offset of the Font Awesome icon from the text.

### **Full Width**

Specifies whether the menu is full width when used inside a layout grid.

### **Title**

Specifies the menu title when the menu is in mobile mode.

### **Breakpoint**

Specifies the width where the menu will switch from desktop to mobile mode.

### **Icon position**

Specifies the position of the 'hamburger icon'. Left or right.

### **Max-height**

Specifies the maximum height of the drop down menu in mobile mode.

### **Arrow offset**

Specifies the offset to the arrow from the text.

### **Styling**

The menu supports 2 menu levels and each level can have its own colors/padding.

***How to install this extension so it is available in WYSIWYG Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

***Requirements***

WYSIWYG Web Builder 11.2 or higher

WYSIWYG Web Builder 12.2 or higher to support responsive font-size.

***License Agreement***
