# Color Menu

The Color Menu implements a multi-level menu where each menu item (and sub item) can have different colors for text, background, border and the icon.

The menu has support icon libraries (WWB16.1+), like Font Awesome, Material Icons, IonIcons etc. https://wysiwygwebbuilder.com/iconfonts.html
Icons can also be published as embedded SVG to keep the page weight low.

Position
Specifies the position of the menu within its container: left, center, right or justified. 'justified' makes all menu items the same width to fill the full width.

Minimum width
Specifies the minimum width of the sub items.

Overflow
The built-in animations use CSS transforms to animate the sub menus. This affects the page width because when the items are not visible they are outside the viewport, which may add horizontal scrollbars. To prevent this, you can set overflow to 'hidden'. This will add 'overflow-x: hidden' to page.

Styling
The menu has many styling options like text, background, border, padding, shadow etc. The colors in this section are the default colors. You can also set the colors for each item individually in the link settings.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 12.2 or higher to support responsive font-size.
WYSIWYG Web Builder 16.1 or higher to support icon libraries.

License Agreement
This is a commercial extension for WYSIWYG Web Builder.
This extension is not free! To use it on your website you will need to buy a license:
