

## Elastic Menu

This menu has an elastic movement when you switch between active menu items. Whenever the mouse moves over a menu item, the background style item follows the mouse to that item, smoothly highlighting the currently active item.

The Elastic Menu has the usually styling options like font, background, border, text color and padding. The alignment of the buttons can be set to left, center right and justify. Also, several animation easing effects are included. The animation can be triggered by 'onmouseover' or 'onclick'. The border style of the button can be set to all, bottom, left-right, top and top-bottom.

***How to install this extension so it is available in WYSIWYG Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\
