

## Glow Player

Glow player is a circular HTML audio player with playlist support and animated glow effect when the music plays. The player has many styling options, including the ability to customize play, pause, stop and playlist icons.

Online demo:

<https://www.wysiwygwebbuilder.com/support/glowplayer.html>

### Tracks

In this section you can add, edit or remove tracks. For each track, you can set the filename, artist and title of the song. The user can make the playlist visible by clicking the 'playlist' icon'

### Glow effect

The extension has 16 built-in glow effects like neon, fire, rainbow etc. The effect animates when music is playing.

### Glow Blur

Specifies the blur radius of the glow effect. The higher the number, the more blurred the shadow will be.

### Glow width

Specifies the width (border) of the glow effect.

### Glow animation

There are two types of animations:

- Slide, this will slowly move the effect
- Rotate, this will rotate the effect

### Spacing

Specifies the spacing between controls.

**Responsive**

The extension player is responsive by design. This means that you can use it in layout grid (flexible layout) or in fixed/absolute layout using breakpoints.

**Styling**

The player has many other styling options to customize the font, size, colors, padding, track, info panel etc.

**Icons**

It's also possible to customize the icon for play, pause, stop and playlist. Most icon libraries that work with WWB's icon object, will also work with player.

Icons will also be published as SVG to reduce the output size.

Note: for performance reasons the workspace only renders a 'place holder' of the player. Use preview or publish to view the full player.

***How to install this extension so it is available in WYSIWYG Web Builder?***

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

***Requirements***

WYSIWYG Web Builder 16 or higher
