

Honeycomb Menu Extension

The Honeycomb Menu extension implements a responsive navigation menu with hexagon shaped buttons.

Online demo:

<https://www.wysiwygwebbuilder.com/support/honeycombmenu.html>

Adding images

Click 'Add' to add a new image. To add multiple images at once, hold down the SHIFT-key on your keyboard while pressing the Add-button. Each image can have a title, description, link and background color.

Style

In the style properties, the colors, size and font can be configured.

Spacing

Specifies the vertical spacing between icon and text.

Scale

Specifies the scaling factor of the menu items. This can be used to control the spacing between the buttons. For example, if you use a scaling factor of 0.98, then the buttons will be smaller so there will be more space between the buttons.

The default value is 1.00

Columns

Specifies the number of buttons in a row. This value is responsive so it can be different in breakpoints. There is also an 'auto' option. In that case, the menu will use built-in breakpoints.

Transition

Specifies the duration and easing of the hover transition.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 16 or higher
