# Like This

This extension for WYSIWYG Web Builder provides a self-contained liking system that showcases an icon and a count of likes, without the need for a database. It enables visitors to express their appreciation for 'something' on your website, such as an article or an image. Each visitor is limited to one vote per session, ensuring fair and accurate feedback.

The results are stored in a plain text file called likethis_db.txt. If you use multiple 'Like This' extensions, they will share the same file. This file is usually created automatically, but if the folder lacks write permissions, it won't be generated. Please ensure that the folder has appropriate write permissions.

Note: This extension uses PHP, but you don't need to change the page extension to PHP. The rating works in the background via AJAX, and the result updates instantly without reloading the page. The script that handles AJAX requests is called likethis_update.php.

Online demo:
https://wysiwygwebbuilder.com/support/like/likethis.html

Styling
The extension has styling options to customize text color, icon color, font-family, font-size and passing.

Icon
It's also possible to customize the icon. Most icon libraries that work with WWB's icon object, will also work with the 'Like This' extension. The icon will also be published as SVG to reduce the output size.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 16 or higher
