Plyr with Playlist

Plyr is a responsive, lightweight HTML5 audio player by Sam Potts: https://plyr.io/
This extension for WYSIWYG Web Builder adds playlist functionality to player, making it even more powerful. Controls (volume, mute, download, time, repeat etc) can be switched on /off and of course properties like font, padding and colors are customizable.

Online demo:
https://www.wysiwygwebbuilder.com/support/plyrplaylist.html

Tracks
In this section you can add, edit or remove tracks. For each track, you can set the filename, title/artist and duration of the song. Note that the duration is only used for display purposes in the playlist. The player itself uses the actual length from the audio file. This means that instead of the duration you can also use some other information for the right column (like the artist, year etc).

Responsive
The extension player is responsive by design. This means that you can use it in layout grid (flexible layout) or in fixed/absolute layout using breakpoints. Also, the padding and font size values can be different in breakpoints.

Styling
The player has many styling options to customize the font, size, colors, padding, seekbar etc.

Controls
Here you can configure which controls are be displayed:
Play, progress, restart, volume, mute, current time, duration, download.
You can also set the spacing between control and icon size.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 15 or higher
