

Audio Button

Audio Button is a minimalistic HTML (single) audio player with just one button. The play and pause icons can be customized. The outline of the button is used to indicate the progress of the song.

Online demo:

<https://www.wysiwygwebbuilder.com/support/audiobutton.html>

Filename

Specifies the name of the audio file.

Title

Specifies the title/ artists of the song. The browser will display this as a tooltip when the user moves the mouse cursor over the button.

Styling

The player has styling options to customize background color, icon color and the color/size of the progress indicator (outline).

Icons

It's also possible to customize the icon for play and pause. Most icon libraries that work with WWB's icon object, will also work with player. Icons will also be published as SVG to reduce the output size.

Responsive

The extension player is responsive by design. This means that you can use it in layout grid (flexible layout) or in fixed/absolute layout using breakpoints.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 16 or higher
