

Responsive Multi Level Menu - Version 1.2

The Responsive Multi Level Menu is a responsive, space-saving drop-down menu with subtle effects inspired on a tutorial by Mary Lou:

<http://tympanus.net/codrops/2013/04/19/responsive-multi-level-menu/>

The 'hamburger' menu button has a fixed size. The size of the object's outline determines the width of the drop down menu. This width can be different for each breakpoint.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 11.1 or higher

WYSIWYG Web Builder 12.2 or higher to support responsive font-size.
