# Review Results

This extension is part of the "Review" system. It displays a summary of the review ratings. You can place it anywhere on your website. Just make sure you use the same database settings as in the 'review' extension.

Note: this extension uses PHP to get the results from the 'review' database. So, the page extensions should be set the 'php', otherwise the browser will only show the code.

Demos:

Styling
The extension has styling options to customize text color, icon color, font-family, font-size and padding.

Icon
It's also possible to customize the icon. Most icon libraries that work with WWB's icon object, will also work in this extension.
The icon will also be published as SVG to reduce the output size.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 16 or higher
