

Second Level Menu

This extension implements a (responsive) horizontal icon menu with second level navigation using CSS only (no JavaScript).

The menu has support icon libraries (WWB16.1+), like Font Awesome, Material Icons, Open Iconic, IonIcons etc. <https://wysiwygwebbuilder.com/iconfonts.html> Icons can also be published as embedded SVG to keep the page weight low.

Note that buttons with sub items should not have a link, otherwise the sub menu cannot be opened on mobile devices! Mobile devices do not support 'hover' functionality, so a 'click' will open the link.

Styling

The menu has many styling options like text, background, padding etc.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 12.2 or higher to support responsive font-size.

WYSIWYG Web Builder 16.1 or higher to support icon libraries.
