

SuperBox Extension

SuperBox is a different type of 'lightbox'. Instead of showing a popup that takes over the entire screen, it expands the lightbox in the middle of the thumbnail grid. SuperBox is a fully responsive image gallery, which only loads full size images on-demand as needed. The extension has many styling properties.

SuperBox can be used in responsive layouts (with breakpoints) or inside a layout grid for full width/flexible layouts.

Online demo:

<https://www.wysiwygwebbuilder.com/support/superbox.html>

Adding images

Click 'Add' to add a new image. To add multiple images at once, hold down the SHIFT-key on your keyboard while pressing the Add-button.

Each image can have a thumbnail, title, description and link.

The thumbnail image is optional, but if you use specific dedicated (smaller) thumbnail images then the loading time of the gallery will be faster. Also, it allows you to use images with a different aspect ratio, so you can use for example square images for the gallery grid.

Background Color

Specifies the default background color of the gallery grid.

Breakpoint

Specifies the breakpoint at which the gallery switches from horizontal to vertical mode for mobile layouts.

Filter

This option makes it possible to apply a filter to the thumbnail images. The filter will be removed when the mouse is hovered over the images.

The following filters are available:

- sepia
- grayscale
- blur
- opacity

Spacing

Specifies the spacing around images in the gallery grid.

Padding

Specifies the lightbox padding.

Maximum Width

Specifies the maximum width of the full-size image.

Border

Specifies the width, color and radius of the border around the full-size image.

Text Color

Specifies the text color of all text and icons.

Opacity

Specifies the opacity of the description text, so it has different contrast as the other text.

Background Color (Text)

Specifies the background color of the lightbox.

Spacing (Text)

Specifies the vertical spacing between text items.

Text

Specifies the styling of the text in the content area.

Button

Specifies the styling of the 'Read More' button. If you leave the Text field empty, then the button (with link) will not be displayed.

Navigation

Specifies the size and offsets of the navigation buttons (close/next/previous).

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 15 or higher
