Text Stroke Menu

This extension implements a responsive "text stroke" menu. Initially the menu will only display the outline (stroke) of the text/icon. When the visitor hovers over the item, the text will become solid with animation (fade, slide left or slide right). The menu supports horizontal and vertical orientation (or both for responsive layouts).

The Text Stroke menu has support icon libraries (WWB16.1+), like Font Awesome, Material Icons, Open Iconic, IonIcons etc.
https://wysiwygwebbuilder.com/iconfonts.html
Icons can also be published as embedded SVG to keep the page weight low.

Online Demo
https://wysiwygwebbuilder.com/support/textstrokemenu.html

Font
Specifies the font-family, size, color and style of the text.

Stroke
Specifies the color and width of the text stroke.

Fill Color
Specifies the color of the filled text (on hover).

Orientation
Specifies the orientation of the menu: horizontal, vertical or responsive. If set to 'responsive', the menu will display horizontal in desktop mode and vertical in mobile mode. The **breakpoint** property determines when the menu will switch to mobile.

Animation
Specifies the type, easing and duration of the transition.

Text Shadow
The menu also supports text shadow effects.

Responsive Properties
The font-size, padding and text alignment are responsive, so they can have a different value in breakpoints.

How to install this extension so it is available in WYSIWYG Web Builder?
You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:
My Documents\WYSIWYG Web Builder\system\extensions\

Requirements
WYSIWYG Web Builder 14 or higher
WYSIWYG Web Builder 16.1 or higher to support icon libraries.
