

Sheet Slider Extension

The Sheet Slider is a clean, CSS-powered slideshow that “flips” through each image like its own sheet. You can choose fade, horizontal or vertical transitions (with adjustable interval, duration & easing), lock the slide ratio, and style your title/description (font, size, alignment, spacing). Built-in radio-button dots and arrow controls let you navigate, and you can tweak their size, padding, colors and accent backgrounds to match any design.

Online demo:

<https://www.wysiwygwebbuilder.com/support/demos/sheetslider.html>

Adding image

Click 'Add' to add a new image. Each image can have a thumbnail image, (optional) large, title and description. The image can either be a URL or a local file.

To add multiple images at once, hold down the SHIFT key while clicking the 'Add' button.

Interval

Delay (in ms) between automatic slide changes; set to 0 to disable autoplay.

Effect

Transition style: fade, horizontal slide, or vertical slide.

Animation duration

How long (in ms) each slide transition takes.

Aspect ratio

Width-to-height ratio (e.g. 16/9) that the slide container maintains.

Font family

Typeface used for slide titles and descriptions.

Text

Color applied to all title and description text.

Sheet space

Padding (in px) around the slide "sheet" for text/meta overlay.

Text alignment

Horizontal alignment (left/center/right) of your overlay text.

Title size

Font size (in px) of each slide's title.

Description size

Font size (in px) of each slide's description.

Navigation Arrow size

Width & height (in px) of the Prev/Next arrow icons.

Arrow

Color of the navigation arrow graphics.

Dot size

Diameter (in px) of the pagination itemn.

Dot

Color of the pagination dots.

Arrow padding

Inner spacing (in px) around each arrow button.

Arrow background

Fill color behind the arrow icons.

Dot background

Fill color behind the pagination dots.

How to install this extension so it is available in WYSIWYG Web Builder?

You can use the Extension Manager (Menu->Tools->Extension Manager) to install this extension.

Alternatively, you can manually copy all files from the zip file to the Web Builder extensions folder. Usually this folder is in this location:

My Documents\WYSIWYG Web Builder\system\extensions\

Requirements

WYSIWYG Web Builder 15 or higher
